

Trans-Comm Group

Accelerating nation-scale projects across East Africa

Agriculture • Health • Energy • Water • Infrastructure • Education

Offices: Paris • Tunis • Nairobi

Who we are

-  Integrator of industrial & financial partners
-  End-to-end: engineering → finance → EPC → O&M
-  15+ years operating presence
-  Nairobi hub; Red Sea extension via Djibouti

-  "Visible & visible" reference sites

Vision & mission

Scalable, bankable, duplicable programs delivering food security, universal health access, reliable energy, and inclusive growth.

-  Technology transfer
-  Skills transfer
-  Long-term local governance

One-stop partner for governments

Engineering & regulatory readiness

Technical studies, impact assessments, permits, land rights, and regulatory frameworks adapted to local context.

Structured finance & partnerships

PPP/BOT models, DFI coordination, ECAs, sovereign guarantees, and blended finance solutions.

Turnkey delivery

EPC management, logistics, commissioning, quality assurance, and certified handover processes.

Operations, maintenance & training

Long-term O&M contracts, parts supply, knowledge transfer, and local capability building.

Bankable projects with sovereign operations

Integrated medical cities

CHU, cancer centers, labs, health university

Local production: vaccines, HIV, generics, oncology

Anti-counterfeit medicines program

East Africa Health Hub ([Kenya, 50 ha](#)) — groundwork 2025; Phase-1 2026

Food security & value add

Regional hubs: crops, storage, distribution

Women-in-rural programs

Dairy, fruits, cereals value chains

Djibouti free-zone storage (Jan 2026) — Red Sea corridor

Electrify to industrialize

Solar plants 10–100 MW

500 MW/yr PV factory ambition

Regional transport & interconnections

References: [Rwanda](#) • [Burundi](#) • [Kenya](#) • [Benin](#) (May 2023)

Safe, reliable access

-  Desalination & wastewater treatment
-  Urban network upgrades
-  Rural solar pumping & filtration
-  Collaboration with international institutions

The enabling backbone

Roads, dry ports, logistics hubs

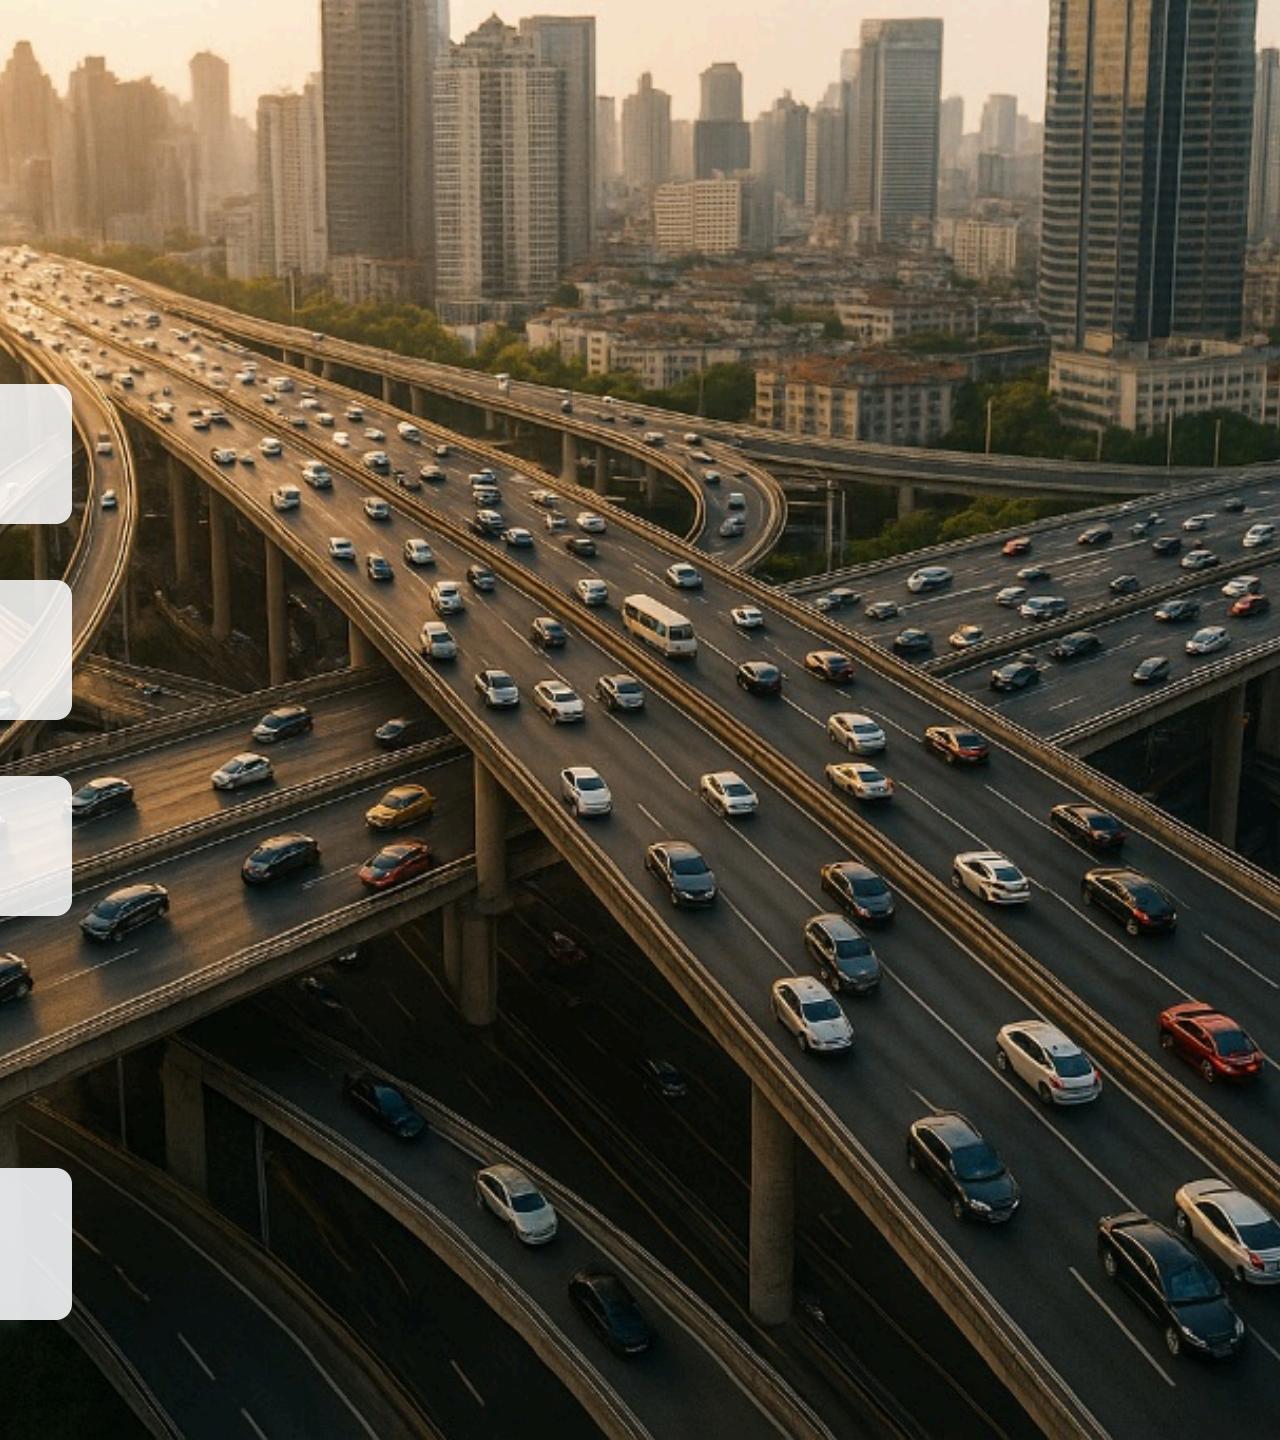

Last-mile fiber & rural connectivity

Smart-city monitoring

Synergy: agriculture • health • industry

Human capital at the core

-  Embedded in medical cities & new universities
-  Energy institutes next to plants/factories
-  Farm-schools & agro-industry centers
-  Public-administration academies

Key Performance Indicators:

 graduates/year

 12-month employment

 women's share

 retention

 % local O&M

From study to impact

Process timeline

Financing instruments

PPP

BOT

Concessional lines

Blended finance

Output-based funding

Control

Visibility

Jobs

Execution across contexts

-  Mali (Gao/Ségou), Angola, Niger, Burkina Faso, Togo
-  East Africa hub: Nairobi
-  Djibouti free-zone logistics plan

Coalition strength

Industrial, financial and institutional partners

Compliance with AU/EU/DFI guidelines
